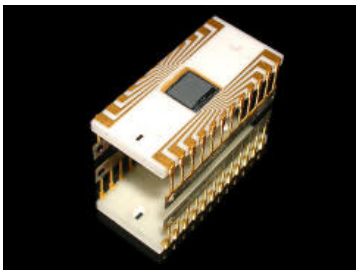
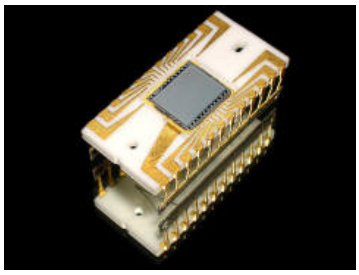
## Unfinished Chips

Home

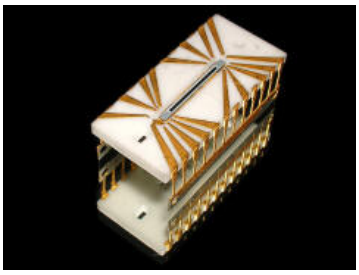
In this section you can see some unfinished chips and semiconductors. From many I don't know their ancestry or from which manufacturer they are, but this stuff is very nice to look at! If anyone knows details of some chips and items, so please let us know, we all would be very thankful for any information's!



Kind of early CCD Sensor.
Unbonded, with core. No manufacturer details on the core or on the package.

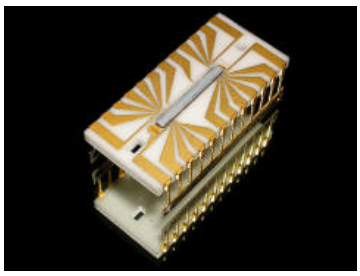


Kind of early CCD Sensor.
Unbonded, with core. No manufacturer details on the core or on the package.

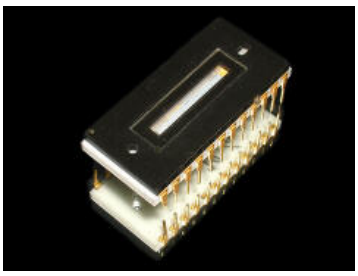


Early kind of CCD sensor or finger-print sensor. Unbonded
No details on the core.

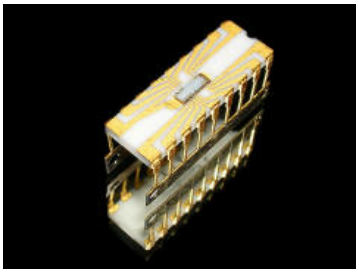
Without core, nice white item with thick gold traces.



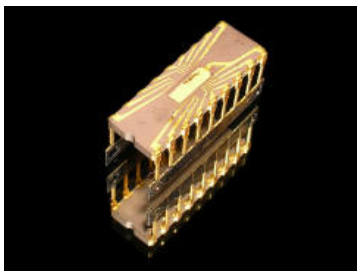
Early kind of CCD sensor or Finger-print sensor. Unbonded
No details on the core.



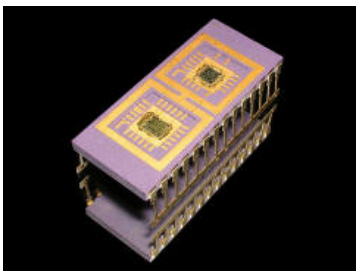
Early kind of CCD sensor or Finger-print sensor. No
Manufacturer known.



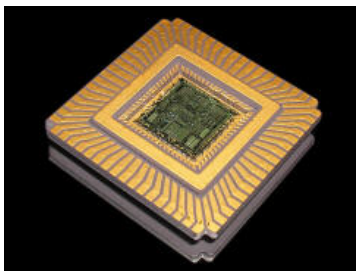
Small 18 pin chip with bonded core. Maybe also any kind of CCD Sensor.
No details on the core.



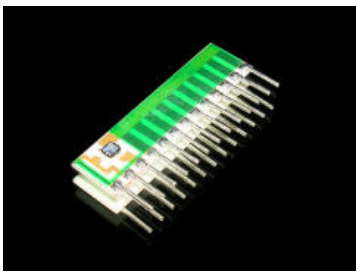
Nice small 18 pin purple ceramic with gold traces.



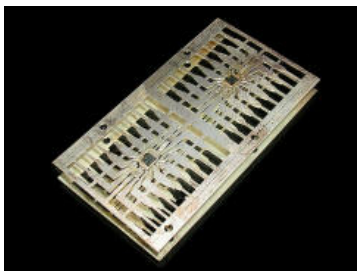
unknown 2 Core unfinished chip



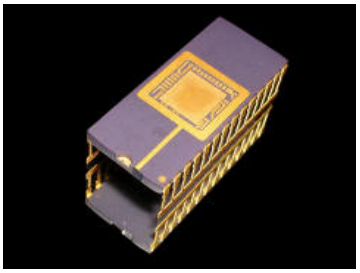
unfinished SAB80286 processor



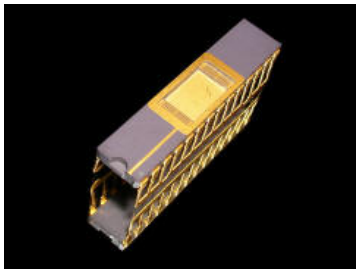
unknown, unfinished something.
white ceramic with small die on it



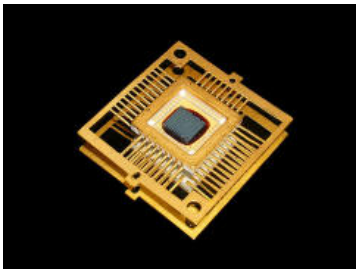
unknown, unfinished 16pin ic?s with cores on it.



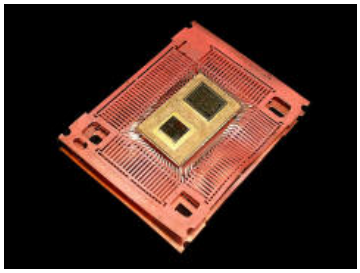
unfinished 28 pin ceramic package
with gold pins



unfinished 28 pin ceramic package
with gold pins

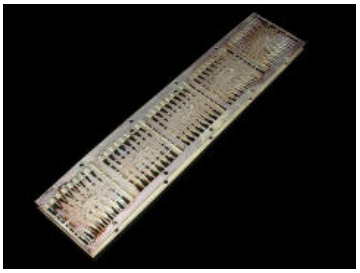


unfinished memory in gold frame.
click HERE for a closer picture of the
core.

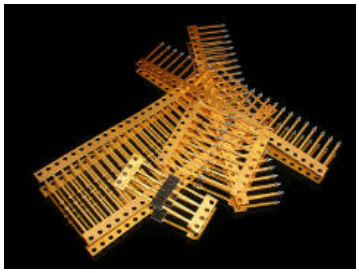


unknown, unfinished dual core
chip. No details found.
closer pictures: pic1, pic2

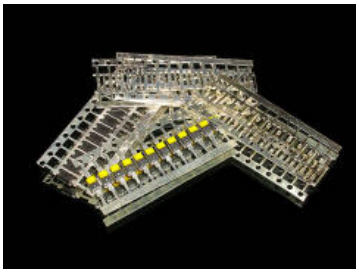
---



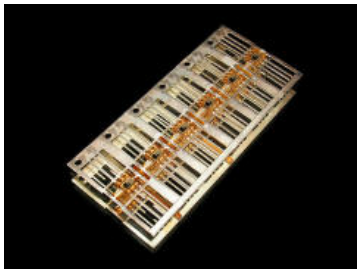
unfinished 16pin ic?s
without cores



unfinished diodes with
gold legs.

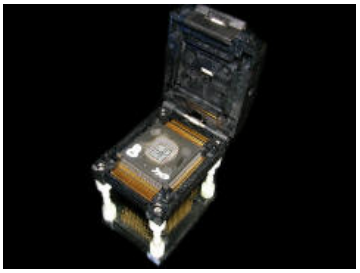


unfinished diodes with
silver legs.

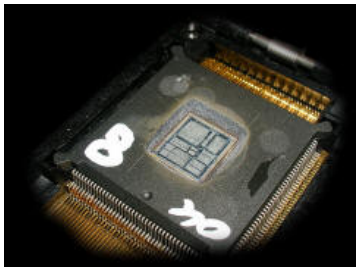


unknown, unfinished kind of
opto-ic.

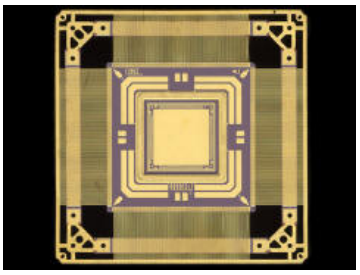
---



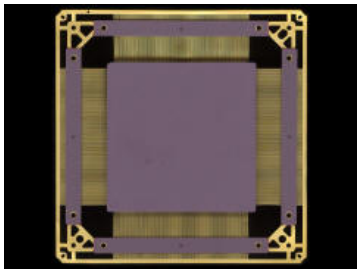
Test and measuring socket
with etched plastic chip
to uncover the die core.



Uncovered die core.
This is a logic device from
Siemens.

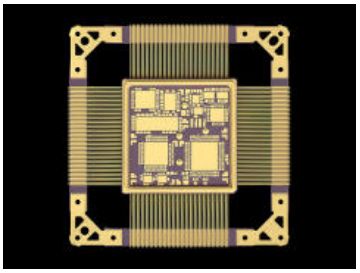


Very heavy and nice unready
chip wired in a gold/ceramic
tray without die.

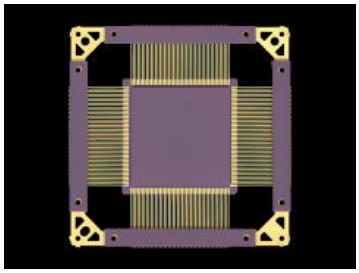


....and the bottom...

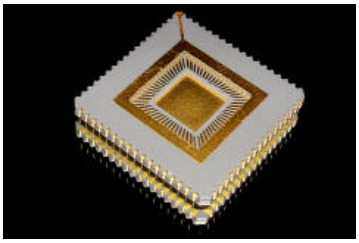
---



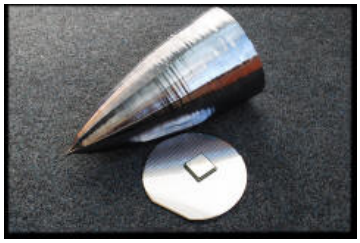
Unready hybrid chip from Kyocera.
This chip is a part of a solar cell
controller. Very nice item....



.... and the bottom.

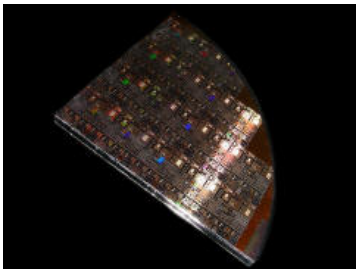


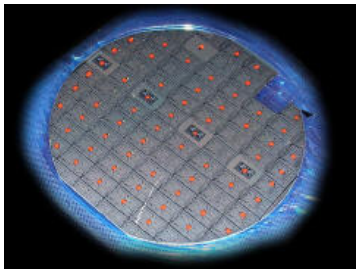
unready ceramic lcc package.

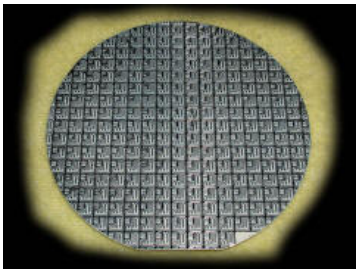


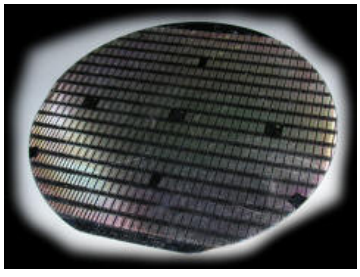
very heavy silicon ingot,

---









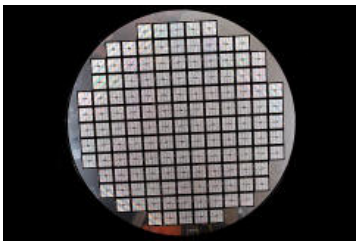
A quarter wafer.

2" wafer with structure and cut on tape.
click **HERE** for a closer picture of a core

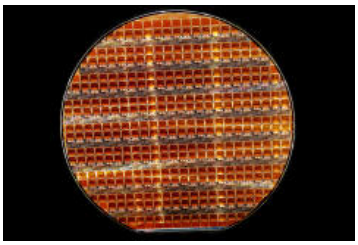
2" wafer with power mosfet dies
Manufacturer: Siemens

5" wafer with EPROM cores
Manufacturer: Siemens

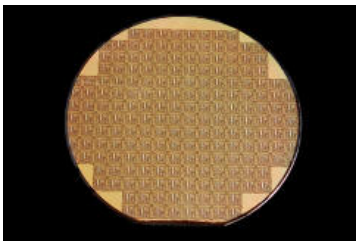
---



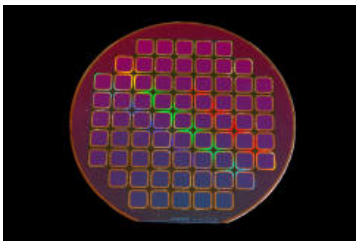
Wafer with IGBT dies.



unknown wafer

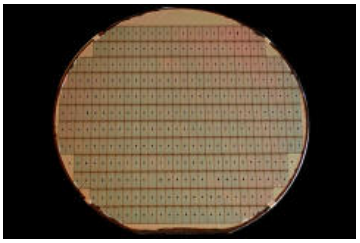


wafer with 8051 die cores.

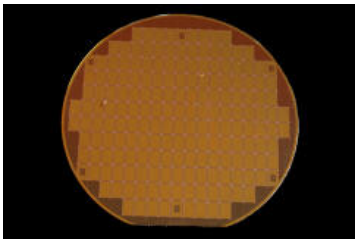


interesting unready wafer.

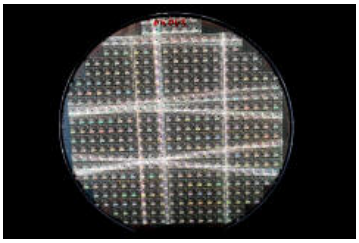
---



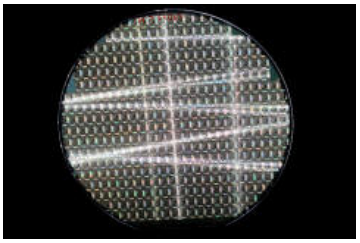
wafer with memory dies.



interesting unfinished wafer



unknown wafer



unknown wafer

---
